

GGA Software Services LLC

Position Description: SharePoint Developer

Position: SharePoint Developer
Type: Permanent
Location: St. Petersburg, Russia
Travel: None
Compensation: Competitive compensation package commensurate with qualifications and experience

Company Description:

GGA provides world-class informatics services – software engineering, algorithm development, and data curation services – to companies ranging from early-stage companies to global corporations. We develop and maintain best-of-class informatics applications and content databases, as well as create state-of-the-art algorithms and models. GGA also provides ongoing support, maintenance, and quality assurance services.

The 400 professionals at GGA’s development facility in St. Petersburg, Russia, combine deep domain knowledge, mathematical expertise, and software engineering excellence to solve client problems in cutting-edge informatics areas. GGA’s project managers in Europe and the U.S. have a proven track record of working closely with clients to develop superior applications on time and within budget.

Position Description:

GGA Software Services is seeking an accomplished SharePoint Developer to work at GGA’s development operations center in St. Petersburg, Russia. The position involves participation in SharePoint development projects concerning electronic bio- and cheminformatics applications for life sciences client companies headquartered in the United States and Europe. GGA is seeking knowledgeable SharePoint developers with broad-based experience in developing platforms and applications that are relevant to the life sciences industry.

Experience & Qualifications:

Required Experience

GGA Software Services LLC

- Experience in design and development of solutions based on Microsoft Office SharePoint Server 2007, SharePoint 2010, and SharePoint Services 3.0
- Two years experience developing TSQL, JavaScript, and C++ applications
- Experience with administration of MS SQL Server
- Working knowledge of technical English
- Excellent communication and presentation skills
- Ability to communicate with members of project teams at various levels within the organization

Preferred Experience

- Experience developing Windows Workflow Foundation, InfoPath, Nintex, and Workflow
- Experience in English-speaking, customer-facing roles
